PROFILE

Full-stack product engineer and startup builder who turns local problems into dependable web products. I work across product strategy, data models, APIs, responsive interfaces, integrations, QA evidence, deployment, and the handoff that helps a team keep moving. Based in Ethiopia and available for product, MVP, and platform work.

EXPERIENCE

CEO and startup builder — **EthioVista · Deborah School · TenaSew · Negus Gebeya** — Ethiopia-rooted startups

Lead and build products across travel, education, wellness, and commerce. Shape each venture from local problem and user workflow through product architecture, launch, iteration, and evidence-backed delivery.

Web Development Instructor — **Ethio Computer School** — Teaching · Digital skills

Taught web development through practical, project-led learning. The official course is titled *Learn Web Development Through Real Projects* at a school that describes itself as Ethiopia's leading digital skills school. Course page · Watch the course VSL

Marketing Manager — **Gezahegn and Elfinesh Hotel & Resort** — Hospitality · Marketing

Worked in marketing for one of Ethiopia's largest hotel and resort operations, building experience in brand positioning, customer communication, and connecting an organization with its audience.

Full-stack product engineer — **Independent product work** — 2023 — Present · Ethiopia / Remote

- Shipped product-shaped workflows across education, commerce, wellness, and travel: onboarding, auth, search, content, practice, payments, messaging, progress, and administration.
- Own the boundary from user journeys and schemas to typed APIs, responsive React interfaces, integrations, automated checks, deployment notes, and maintenance handoff.

EDUCATION & DISTINCTION

Bachelor of Science in Computer Science — **Hawassa University** — Ethiopia

Computer Science degree from one of Ethiopia's leading universities, forming the technical foundation behind my product, systems, and software engineering work.

Gold medalist — Diploma Practical Theology — **Holistic Bible College** — Across all of Ethiopia

Recognized as a gold medalist in Diploma Practical Theology across all of Ethiopia.

Selected work & capabilities

A portfolio of live product surfaces, practical systems thinking, and evidence-led delivery.

SELECTED PRODUCTS

Deborah — **Education SaaS** web-cdry.vercel.app

Grade 12 learning platform with notes, question bank, topic practice, timed exams, server scoring, progress, recommendations, achievements, AI study support, provider auth, payments, and admin workflows. Source repository

Negus Gebeya — **Marketplace** negus-kappa.vercel.app

Marketplace workflow for listings, seller trust, media uploads, search, favorites, messaging, orders, Chapa checkout, seller earnings, AI listing assistance, and live selling. Frontend · Backend

TenaSew — **Wellness platform** tenasew.vercel.app

Wellness content, onboarding preferences, habits, completions, progress, English/Amharic paths, and bounded non-diagnostic AI guidance. Source repository

EthioVista — **Ethiopia travel platform** ethio-vista.com

Live travel discovery experience covering destinations, stays, experiences, transport, guides, trip planning, multilingual entry points, and an AI assistant marked in development.

TECHNICAL TOOLKIT

Product work

TypeScript · React · Next.js · PostgreSQL · Drizzle ORM · Hono

When the problem calls for it

Python · FastAPI · Go · MongoDB · Redis · Docker

PHP, Laravel, Java, Spring Boot, C#, Bun

EXTRACURRICULAR

Theological studies

Gold medalist in Diploma Practical Theology across all of Ethiopia, Holistic Bible College.

Music

Vocal, piano, and guitar.

Reading

A steady practice for learning, reflection, and wider perspective.

EVIDENCE AND CONTACT

- Deborah release-readiness report
- Deborah QA test plan
- TenaSew architecture and deployment notes

Open to product work

For product, MVP, platform, and full-stack engineering collaborations.
